Congress of the United States  
House of Representatives  
Washington, DC 20515-1101

May 2024

The current two-year 118th Congress has just over six months remaining. With ongoing division and a major election season upon us, time is short to address critical challenges.

We have had some successes this year, especially funding our federal government and assisting our allies and partners and those in dire need around the world. They show that we can cut through polarization and extremism when we seek mainstream results. My efforts have remained on contributing to these national solutions, along with helping our Hawai'i and my individual constituents.

I am now largely focused again on my House Committee on Appropriations, which is forging next year's budget for all federal government agencies, programs and services. For more on my appropriations and other work on your behalf, please visit [case.house.gov](https://case.house.gov).

It remains critical that I stay in close touch with you, and so I am hosting another live Tele-Talk Story to report back to you, listen to your thoughts and answer your questions. Details are on the left.

Many of you have also asked me for more information on artificial intelligence: what is it; how will it affect us; what do we need to do to realize its opportunities and address its risks. In response, I invite you to a live online discussion with our White House Office of Science and Technology; details on the left.

As always, I look forward to hearing from you and to assisting you any way I can. Information including how to get in touch is below.

Wishing you and yours only the best,

*Ed Case*
